Speaking Out . . .

What's Right With Christmas

By The Rev. Alan Farquhar

In recent years two predominate notes sound as Christmas approaches. The one is that stores and agents of modern advertising move into high gear to push Christmas sales to a record high, I must confess this note seems to begin earlier each year.

The slogan "Do your Christmas shopping early this year," has brought the Christmas merchandise into sight early in November, when it seemed not too many years ago you thought very little of Christmas until after Thanksgiving. The comparison each Christmas season is with the business of the previous season and each year lately we learn that sales are at an all-time high.

The other notes come from clergymen and concerned laymen who raise the cry that Christmas has become almost completely commercialized; that it has become nothing more than a pagan holiday. The fervent plea is "To put Christ back in Christmas." So sermons are preached and articles are written on the general theme: "What's wrong with Christmas?" Yet I wonder if it is not about time we pause and ask ourselves the question, "What's Right with Christmas?"

First of all, there is a spirit of giving, a generosity and concern towards other people that is prevalent in so many people, and to such a greater degree than you find at any other season of the year; giving that includes more than just our close personal friends, or family, but giving that also includes the unknown to us who are in need.

The next thing that is right about Christmas is that it is a season of great joy. For most of us it is a time of happiness and pleasure—and in many ways this is what motivates much of our giving; we want everyone to be happy, to be joyful on Christmas Day. This is not a pitch: to eat, drink, and be merry, that the most important thing is to let yourself go and get a bang out of life; that all pleasure and fun is right. But it is a plea to recognize that joy and pleasure have a place in life; and that life without joy is not worth living; that at Christmas time, we are perhaps more aware of the real Christian joy of living than at any other season.

We speak of putting Christ back in Christmas, but is that truly the issue? Charles Dickens wrote the immortal "Christmas Carol" extolling the spirit of unselfish generosity—and then complained bitterly because the story did not sell well enough to give him the expected profit. These to whom we give our toys for tots, our Christmas baskets, what becomes of them after Christmas? This joy and happiness of Christmas Day, does it remain

with us? Do we pass it on to others? This feeling of hope, what becomes of it . . . and the enemy with whom we sing carols on Christmas Eve, what becomes of him?

The real problem is not to put Christ back into Christmas, he was, and is always there. Our problem is to get Christ back into the other 365 days of the year. Thank God for Christmas! For on Christmas Eve and Christmas Day all the world is a better place, and men and women are more lovable. Love itself seeps into every heart, and miracles happen. Then, we know that God made us to laugh, to enjoy life as we sing "Joy to the World, the Lord has come."

You know what's right with Christmas? It is the day of "Good news of great joy . . . for to you is born this day in the city of David a Savior, which is Christ the Lord." May He truly be born in your heart this Christmas, and abide in you in the days to come.

Young Democrats Approve Constitution, Elect Officers

Cary Smith, temporary president, presided as the club voted on approval of its constitution, permanent officers, membership fees, and nominations for class favorites and Mr. and Miss TC at a called meeting last Thursday.

Since all officers are temporary until the constitution is approved by the club, they first persuaded that issue. The constitution was approved unanimously.

Permanent officers were then voted on. Cary Smith was elected president; Larry Forgy, vice-president; Georgia Odom, secretary-treasurer; and Rey Martinez, student senate representative.

Cary Smith and Larry Forgy attended the state meeting of the Young Democrats Dec. 14, to acquire state affiliation for the club. Membership fees for the local club were set at two dollars.

Nominations for class favorites and Mr. and Miss TC were then held. The results yielded Georgia Odom and Patti Bryan as nominees for favorite sophomore girls;

Student Recital By Music Group

The Texarkana College Music Department presented a student recital last Thursday in the Music Building. Barry Johnson, division chairman, said that this is the first of what he hopes will be a series of recitals by the students.

Students participating were John Finley and Bruce Douglas with piano numbers; David Porier with trumpet accompanied by Mr. Johnson; Larry Johnson, baritone; LaDawn Tyler, soprano; David Sellers, baritone; Caroline Hendrickson, Mezzo-soprano; Hugh Campbell, baritone; Gwen Owen, soprano; Haley Clark, bass-baritone; Ricky Dodd, baritone; and Ann Combs, soprano.

Mrs. H. J. McCrossen and Mrs. Henry Jackson, instructors in the music department, accompanied the students that sang.

Smith, Forgy Attend State Demo Confab

Cary Smith and Larry Forgy attended the meeting of the State Democratic Executive Committee in Austin last Sunday.

The purpose of the meeting was to grant charters to the newly formed and reorganized Young Democratic Clubs of Texas. The TC Young Democrats were there to obtain a charter for the Texarkana College Club.

PERMANENT OFFICERS for the Young Democrats Club for the 1968-69 term are Rey Martinez, student senate representative; Georgia Odom, secretary-treasurer; Larry Forgy, vice-president; Cary Smith, president.

TREE DECORATING — President J. W. Cady, hit by the Christmas spirit, offers his secretaries a helping hand in tree decorating. The Christmas holidays will last from Dec. 18 to Jan. 2.

PERSONAL SATISFACTION GAINED IN PURSUING MUSICAL STUDY

Students with an interest in developing their musical talent should be aware of the courses offered by the Music Department of Texarkana College.

Private instruction in voice, piano, organ, woodwinds, brass, and percussion is available to all students, regardless of their background. Those now enrolled in these courses often have major fields such as speech, business administration, nursing, and education.

The Texarkana College Band, Choir, and Vocal Ensemble include young persons who will in the future become accountants, speech therapists, and even engineers. Yet they find personal satisfaction in pursuing musical study. Memberships in these organizations offers an opportunity for community service as well.

Music appreciation and humanities offer interesting study to the individual who desires to broaden his knowledge of the total arts areas.

Hunting Trip Results in Death Of Larry McDaniel

Larry Wayne McDaniel, 19, of 2200 Pineview Dr., died Dec 7, of exhaustion after a boating accident at Millwood Lake. Funeral services were held at the First Baptist Church Dec. 9.

He is survived by his parents, Mr. and Mrs. Walter E. McDaniel, three sisters, Mrs. Hogan Cooper, Gayle and Denice McDaniel.

Larry was a sophomore at Texarkana College. Anyone wishing to memorialize Larry may contribute to the First Baptist Church Youth Fund.

President, Dean Attend Southern Association Meeting in Atlanta, Ga.

Dr. J. W. Cady, president of Texarkana College, and Levi H. Hall, academic dean, attended the annual meeting of the regional accrediting agency of the Southern Association in Atlanta, Ga., Dec. 2-4.

The Southern Association of Junior Colleges met on Monday, and Dr. Cady and Dean Hall found this to be a most rewarding session. This theme was "Effective Teaching." The discussion was led by junior college faculty members and recent junior college graduates on "what makes an effective teacher."

The speakers stressed the necessity for changes in the curriculum to meet the needs of modern colleges. Dr. Cady said it was

pointed out that 80 per cent of the jobs of today were unknown when the present faculties were in college.

Other speakers heard by the 2000 educators were Art Buchwald, journalist; George Bundy, president of the Ford foundation; Dr. Ralph Tyler, director emeritus of the center for advanced study of behavioral sciences of Stanford University; Dr. Samuel D. Proctor, dean of special projects of the University of Wisconsin.

The Southern Association Accrediting Agency last visited Texarkana College in 1963. TC will do a self-study in 1971 and will be re-visited by the association in 1973.

Happiness Is . . .

"Tis the season to be jolly . . ." And, that is exactly what most of TC's students will be at the close of classes today. For today's end brings the start of a long awaited fifteen day vacation from books, tests, and teachers.

Most people have reserved these holiday days for writing letters to Santa Claus, sleeping late, partying, exchanging gifts, eating and working. For some, these days will include a trip out of the dorm—and home.

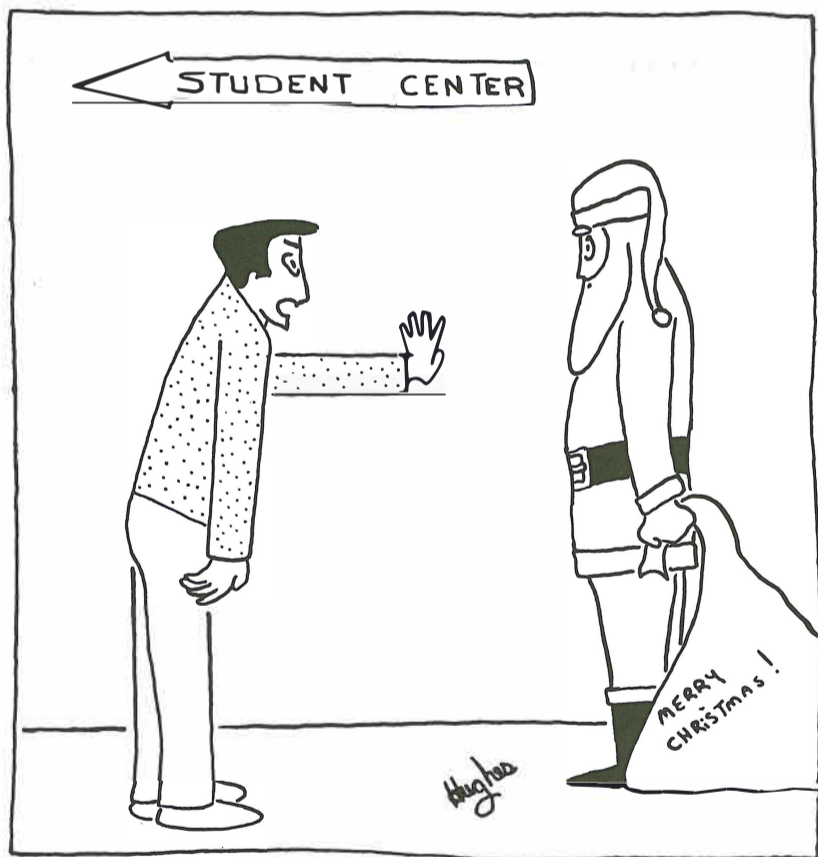

Unfortunately a cloud comes over the Christmas tree when students think of those dreaded final exams January 20-24. Students will then register for the Spring Semester on January 27-28-29. January 30 will mark the beginning of Spring Semester classes. And, after looking into the future, perhaps some time will be spent on research papers, book reports, and finals. But, who knows?

Unfortunately, all students are expected to return to these "sacred halls" on January 2, giving them only one day to recover from the New Year's Eve parties. Ooh!

Glory Be To The Pocket Book!

Love came down at Christmas in the form of a neon light and all of the world was glad to see the specials run on toys for the kids and the multitude rejoiced saying, "Glory be to the pocket book and money belt! May they remain thick through such perilous times." The angels came down to the ranting, raving middle class and they were sore afraid, but the angel of advertising said, "Fear not, for behold I run a special at the mall." And, the middle class rejoiced and went to where the special was, and there came also wise wall street executives from the East saying, "Where is the toy that is sold on special, for we have seen his ad in the journal and have come to match it?"

Through the night a lonely priest sits insisting that this is the birth of Christ, a time of joy and of love, but no one listened for the people were behind on wrapping gifts. God forgive them for they know not what they do and a very Merry Christmas.

Sorry, fella, we don't allow hippies here!

TEXARKANA COLLEGE CONSIDERING EXPANDED STUDENT SENATE ACTIVITIES

J. W. Cady, President

It is the philosophy of Texarkana College to encourage her students to develop and grow academically and physically. In addition to the academic and physical growth of the students, it is the hope of the College that her students will grow in practice and ability to govern themselves and regulate their own affairs.

It has been the philosophy of this administration to seek expanded opportunities for students to serve in the administration of Texarkana College. In recent years, our College students have been placed on regular standing faculty committees of the College to give the students a voice in college decisions and to allow them to express their views to the faculty to make the students voice heard in college matters. Texarkana College students are presently serving on the following committees:

- Assembly Committee
- Commencement Committee
- Student Publications Committee
- Scholarships, Loan and Financial Assistance Committee
- Student Activities Committee

The dormitory students at Texarkana College have been asked to form their own dorm council and gain experience in self government by helping to design and administer regulations for their own group living.

Since most of the Texarkana College students do not reside in a dormitory, and commute daily from home, they have little opportunity to participate in the administration of their own affairs at the College. It is the hope of the College administration that greater opportunities for service and education in the business affairs of the College may be available.

An expanded role for the Student Senate has been the goal for Texarkana College. In the last four years the amount of money placed at the disposal of the Student Senate of Texarkana College has increased from \$200 to \$1,000 in the current school year. In an effort to place additional responsibility in the Student Senate, the administration is considering the possibility of turning over to the Senate the administration of all student activity funds received by the College. The question is continually asked, "Where do our student activity funds go?"

Since the College does not par-

ticipate in inter-collegiate athletics in basketball and football, the bulk of the student activity funds are spent for the college annual, the college newspaper, and for the activities of the Student Senate. A breakdown of these expenses for the current college year are as follows:

College Annual	\$ 7,500
College Newspaper	1,850
Student Senate Activities	1,000
Handbooks	350
TOTAL	\$10,700

The question is asked where does the balance of approximately \$3,000 not budgeted from the student activity funds go? The answer is that this relatively small amount of money has gone into the building fund of the college. Each year Texarkana College ends her business operation with a surplus, and this surplus is transferred to the building fund to the College to provide for future building expansion. By providing for a building fund for the College, the College is able to appropriate \$325,000 as her 25% share of the new \$1,300,000 building program beginning in the spring of 1969 to build a new library, a new science and engineering building, and a new physical education building.

Texarkana College is considering the possibility of suggesting to the Student Senate, beginning in September, 1969, budget and administer all of the student activity funds. The four main categories of expense as outlined above would necessarily have to be budgeted. Any excess of student activities funds over the amounts indicated could be used for the promotion of other student activities on campus. In some colleges all student clubs on the campus propose budgets to the Student Senate which acts as a budgeting agent and allocates certain funds for the activities of each club on the campus during the school year.

The administration of Texarkana College is anxious to know the feelings of the student body regarding this possibility. Does the student body want the Student Senate to take a more active role in the administration of student activity funds? Is the Student Senate willing to take on the added work and responsibility for more interest in the part of the students on the campus and the administration of student affairs on the campus?

Students who are interested in expressing their opinion are urged to make their feelings known to Dean Bill Hughes, Dean of Students at Texarkana College. The Administration of the College earnestly solicits the help and suggestions of the students on the campus in the proper administration of College affairs.

Continuing Efforts Made to Improve Dormitory Facilities

In continuing efforts to improve dormitory facilities and food service at Texarkana College, particularly for dorm residents, the Board of Regents tentatively approved some changes in the present system.

They took into consideration the feelings of the students since the proposed changes will directly affect them. The dormitory residents were therefore handed questionnaires to determine their reaction to the following proposals:

Effective at the beginning of the Spring semester on Jan. 27, allow the men dormitory students the choice of residing in the dorm or in private residences at their option.

Close the student center completely on Saturdays and Sundays and discontinue all food services on those days. Allow students who reside in the dorm the option of purchasing, each month, either a 28 day meal ticket which will pay for three meals per day on Monday through Friday at the cost of \$39 plus tax for the ticket; or purchase a twenty meal ticket for the month at \$18 plus tax.

Presently dorm residents are required to purchase a meal ticket costing \$50 plus tax per month. This pays for three meals daily except on Sunday when only breakfast and lunch are served. The student gets no consideration for the meals he misses.

In regard to dorm regulations for boys, a student is required to live either with relatives or in the dorm unless he is married, or over 21.

If the dorm residents approve these proposals, a major overhaul in these two areas will be in order. This will allow greater flexibility to both boys and girls in regard to food service, and the boys in regard to living quarters.

Merry Christmas from THE KENNEL staff.

CHALLENGING, REWARDING WORK FOUND IN CHEMISTRY DEPARTMENT

Calling all prospective engineers, chemists, agriculturalists, doctors, general scientists, housewives, or anyone who wants a good background in chemistry: to obtain this excellent background you need look no further than the chemistry department here at Texarkana College.

Headed by James H. Bennett, assistant professor of chemistry, the department is one of the finest of any of the regional institutions. Levi H. Hall, academic dean of the college, observes that, "The chemistry department here at TC is strong, and possesses its share of the academic prestige that this college boasts."

Five courses are offered by the department: general chemistry, advanced general chemistry, organic chemistry, advanced organic chemistry, and quantitative analysis.

The two courses in general chemistry train the students in the fundamental principles of pure, theoretical, and applied chemistry. They go into a detailed study of such related subjects as thermochemistry, nuclear chemistry, and quantitative analysis.

The department staff is comprised of Chariman Bennett, Warren S. Dill, associate professor, and Mrs. Jeri Ann Robinson, instructor. Each of these teachers have, in addition to their classroom projects, extra-curricular activities in the field of chemistry.

Perhaps the most interesting of these activities is currently being undertaken by Mrs. Robinson. She is in the process of synthesizing a heretofore unprepared organic compound.

The department is housed in the chemistry building at the science complex. Inside are ultra-modern classrooms, laboratories, and offices. The laboratories constitute excellent facilities for students and teacher research. In addition to the general labs are the four private labs in which elongated experiments can be carried out.

In the labs are several intricate instruments at the disposal of the student. These include a refractometer which measures refractive indices of compounds, a gas chromatograph which is used in testing organic samples, a color-

imeter spectronic 21, a polarograph, a polarimeter, digital read out balances, and several other pieces of equipment.

In informal interview with three chemistry students, Robert Galloway, Stephen De Freitas, and Tommy Henderson, a question on their opinions of the department was asked. All three agreed that the program is both challenging and rewarding. Because of the small number of students (in relation to number of students the other departments have) the teachers have more time to devote to the needs of the individual student. This, of course, works to the advantage of the students.

The general chemistry classes at TC usually average from 15 to 25 students whereas the number of students in a similar class at a university averages over a hundred. In classes approaching this

size the student ceases to be a name and becomes a number.

Dean Hall summed up the academic advantages of studying at TC with these facts. "The chemistry student who does average work here does average or better work, usually better, when he transfers to a four year institution." Statistical proof backs his statement up.

The Texarkana College graduate chemistry major can easily become a lab technician or a chemist journeyman, after which he may advance as far as possible.

Bennett, the department head, suggests to all prospective students that they have some knowledge of algebra. With this knowledge they can be introduced to and trained in a very exciting and rewarding field of endeavor. All this can be accomplished under the roof of the TC Chemistry department.

DOUBLE DOUBLE TOIL AND TROUBLE—James Bennett, on the extreme left, and Mrs. Jeri Ann Robinson, on the extreme right, assist lab students (L-R) John Lawing, Robert Clack, and Philip Shelton in conducting an experiment. Elementary chemistry students have one three-hour lab per week, and the students in the advanced courses have two labs three hours in length per week.

TC—The Place to Meet Basic Foreign Language Requirements

Texarkana College students, have you thought about your next few years of college? Have you decided on your major? Have you thought about the senior college you plan to attend?

Getting through with all basic requirements during your first two years counts for happiness the last two years.

Three or four semesters of foreign languages are a "must" for a B.A. degree in any college, and in most cases, for a B.S. degree, also.

A few instances of Arkansas colleges, for example, are the University of Arkansas, requiring 10 hours of a foreign language for a Bachelor's degree in Arts & Sciences; Southern State, requiring that the B.S. candidate complete one year of language if the major is in natural sciences, and 8 hours if the major is in math—the B.A. candidate must complete two years of languages.

A few instances of Texas colleges are Stephen F. Austin, requiring four semesters of languages as a basic requirement; University of Texas, requiring 10 to 15 hours for a B.A., and 11 to 12 for a B.S. degree.

The above reasons are proof enough, but additional reasons may be found in the catalogs of other colleges in the counselor's offices.

Texarkana College is prepared to offer French, German, and Spanish, to any student who wishes to "start things off right."

Phi Beta Lambda Tours Stock Exchange

Phi Beta Lambda, Texarkana College Business Club, toured the local branch of the New York Stock Exchange, Eppler, Guerin, and Turner, Inc., on Dec. 3.

Mr. Humphreys, manager of the firm, discussed the stock exchange with the members.

Last month Phi Beta Lambda members visited the General Telephone Company and toured the new facilities that assist the new Direct-Dialing System.

Many interesting tours and an annual trip out of town are taken by the club. Last year Ford Motor Company in Dallas was visited. Any TC student interested in the field of business administration may join Phi Beta Lambda by contacting sponsor Ira Robinson, assistant professor of business administration, or by attending the meeting at 9:30 on the first Tuesday of each month.

Four Professors Attend Sherman Curriculum Conference

Four TC professors attended the Biology Curriculum Study Conference at Grayson County College in Sherman, Dec. 7.

Willard Pyle, chairman of the TC biology department participated on the program by discussing biology at Texarkana College. Joe Burgess and Joel McGee from the biology department, and Paul McFerran, chairman division of science and engineering at TC also attended.

The biology faculty of senior colleges, universities and two-year schools of northeast Texas met for a continuing study con-

ference on "a modern Biology Curriculum." The conference was chaired by professors Robert Williams and Bill Wilson of East Texas State University.

The study is concerned with core curriculum studies for students majoring in biology, as well as others whose curriculum requires a laboratory science and those interested in information. The study, made in response to a request from the Higher Education Coordinating Board of Texas, is aimed at a smooth transfer of credits between colleges and universities.

Many Interesting Courses Offered by TC Night School

During the spring semester several new non-credit night courses will be introduced at Texarkana College.

Scheduled to begin, provided that enough people register, are knitting, interior decorating, investment information, blueprint reading, diet and weight control, instrument pilot training, photography, Federal revenue income tax returns, and introduction to conversational Russian.

These classes vary from those which are for people who wish to learn a skill to those which are strictly for enjoyment.

Of the many classes offered this semester, beginner's bridge is of this latter type. In this course taught by Mrs. Kitty Russo persons who have never played bridge can learn the basics of this popular game in three-hour sessions once a week.

Charm Course

Another that could be considered in this group is the charm course taught by Mrs. Joy Head, a graduate of Mr. Lynn's in Shreveport. This course is designed to help the business as well as the non-business woman, and the high school and college student become conscious rather than self-conscious of herself.

With the experience which Mrs. Head has had in this field she is well qualified to teach the six phases included in this course. These are visual poise, wardrobe and styling, make-up techniques, figure control, personality development, and wig and wiglet styling.

Preflight School

The new preflight ground school is of interest to persons who desire to complete every phase toward training for a private pilot's license. Wayne Faulkinbury is using the Sander-son Film Methods of instruction. Some of the major areas that are covered are the preflight facts, meteorology, flight computer, navigation, radio navigation, and Federal Aviation Agency regulations.

G.E.D. Testing

One non-credit course that is very practical is the G.E.D. preparation course. The General Educational Development Test has been developed by the American Council of Education.

The individual who passes the test will be assured a high school equivalency certificate which is recognized in most states as being of equal value to a high school diploma. This test consists of six parts. These include: grammar, social studies, natural sciences, literature, and general mathematics. This class meets three hours a week for 15 weeks. Instructors are Mrs. Linda Watson and Donald Hobbs.

A course in English is offered for personal improvement in the areas of basic grammar, spelling, vocabulary building, faster reading, and letter writing. This course, designed to help the business man and woman, is being taught by Rolfe Wylie.

Social Problems

A social problems course dealing with the rapidly changing system of social institutions in the fields of urban unrest, housing problems, racial tension, deprivation in the urban ghettos, economic dependence, correc-

tions both juvenile and adult, and mental health is being offered. The objective of this course is to provide a beginning understanding of how social welfare concepts and institutions have developed through tradition, experience and sociological change.

This course will be helpful to those who are employed in the welfare programs, health fields, correction, and rehabilitation. It will also be of value to volunteers and persons who would like to be informed in this field.

A key punch operation class has been organized. Key punch operation is one phase of data processing. There is a big demand in this field at present. Carl Self is teaching this course three hours a week for six weeks.

Speed Reading Offered

A course that could be of help in one's work or for one's personal enjoyment is the speed reading class. Designed to assist the individual in attaining a higher degree of speed and comprehension at the same time.

This course will consist of lab work in the area of eye exercise and training in eye movement. Projection machines and mechanical rate reading meters are being used in all phases of lab work.

'Arsenic, Old Lace' Play Well Received In Two-Night Run

Effective performances by Paula Cohan (Aunt Abbey), Bonnie Cate (Aunt Martha) and Gary Moran (Mortimer) were the key factors in the success of "Arsenic and Old Lace." The TC Players' recent production was much enhanced by the characterizations of these three performers.

The two aunts, who could best be described as a couple of sweet, kind, lecherous old sweethearts, added a special touch of hilarity to the already humorous situation. Both Paula and Bonnie's character portrayals, according to one critic, were "appealing." They did an excellent job, both individually and in combination.

Gary Moran gave an outstanding performance as Mortimer, the one Brewster who still had his sanity. The believable portrayal of this nervous young man was due much to the fact that Gary, as Mortimer, maintained his character throughout the play.

Roy Autry, as the Frankenstein-faced Jonathan; Gwen Owen, as Mortimer's fiancée, Elaine; Larry Hogue, as skulking Dr. Einstein, and Haley Clark, as pushy Officer O'Hara, also did excellent jobs.

The play was warmly received by both Friday and Saturday night's audiences, according to Mrs. Mildred Parson, director. As the culmination of many weeks of work, "Arsenic and Old Lace" was not only funny but also enjoyable and entertaining. If you did not see it, you missed a pleasing evening of laughter.

Sarah Carson, left, demonstrates modeling techniques as two unidentified students look on. Mrs. Joy Head, graduate of Mr. Lynn's in Shreveport, is instructor for the course.

Campus

FASHION

By Mary Sterle

With Christmas approaching, and everyone happy, students seem to be dressing to go along with the Christmas season.

Debbie Brown, sophomore, certainly looked smart in her green cotton suit. A button down Ivy League shirt and wide green belt complimented the outfit.

Looking sharp in his goal and yellow checked hopsack slacks with a matching yellow shirt was sophomore Walter Wharton.

A light purple long sleeved turtleneck sweater with a purple and white pleated A-line skirt is a fashionable and neat style chosen by freshman Linda Thornhill.

Ready to go to work after class, Bill Boyce looks handsome in his brown suit and yellow shirt. A brown club tie accents the suit.

Bobby Duey goes all out with his blue sports coat and dark blue pants. His shirt is a deep toned blue with a matching blue tie, cuff links, and tie clasp.

Susan Brown, freshman, looked charming in her black and white polka dotted dress, a large white collar and cuffs accented the dress.

TC Physical Education Teachers Attend Convention, Learn New Methods

Miss Norma Nelson, chairman of the division, Wayne Williams, Mrs. Sue Works, Hub Dungan, and Paul Stewart were the Texarkana College representatives to the 45th annual Texas Association for Health, Physical Education, and Recreation Convention in the Brownwood Coliseum, Brownwood last week.

Miss Nelson said, "The main purpose of this convention is to bring together the physical education of the state of Texas for specialized meetings relating to the various areas of Physical Education. These meetings are valuable in helping one to grow professionally."

"This meeting also, affords one the chance to discuss methods of teaching and activity programs with professionals which in turn, gives insight to solving many problems," she continued.

The TC faculty attended section meetings in dance, intramural sports, research, recreation, aquatics, and progress report on today's health.

"The latest trend in physical education classes is to combine the students into co-education classes," said Coach Williams after returning from the state meeting.

"The main thing you get from a convention of this kind is the association with other members of the profession and the discussion with other members their methods of teaching. By doing this we can improve and update our methods to coincide with other junior colleges in the state," said Coach Dungan.

Experts in the field of Physical Education were brought in to give demonstrations and make speeches on the new techniques. Mrs. Joan Sullivan, a member of

the traveling clinic staff of the President's Council on Physical Fitness directed a demonstration by the Brownwood High School Girls. The convention had a big effect on all TC instructors. They feel that Texarkana College is a step ahead of the new trends with their co-educational bowling course and plans to combine the badminton, tennis, and golf classes next year.

Deadline Today For Roundballers

Men's and Women's Basketball will begin Jan. 7. The deadline for the team listing is today. This year there will be something unique in the basketball program.

Each team must have one official to be responsible for officiating the equal number of games that their team plays.

In football action, the Bud Buddies combined power and determination to beat the Soul Raiders 12-6. The Soul Raiders scored late in the game, but couldn't make good their final drive. The Bud Buddies quarterback, Artie Starr, kept his team to a ground game for steady ground gains and penetrations.

In other actions the Has-Beens were defeated by Circle K 6-0. Circle K seemed to be doing everything right while the Has-Beens seemed unable to rally at any time during the game.

TSEA Christmas Tea

Christmas red punch and holiday cookies were served to the TC faculty and staff yesterday at the annual Texas Student Education Association tea in the Continental Room of the Student Center.

Patti Bryan, president of the organization and Ann Amason, secretary, alternated serving from the table decorated with the Christmas motif.

Mrs. B. Peck, sponsor, and other members of TSEA, greeted the guest.
